📄 About Me – Karthick

Name: Karthick
Profession: Software Engineer / AI Enthusiast

🛠️ Skills

- Java (Spring Boot, REST APIs, Microservices)
- Artificial Intelligence
- Machine Learning
- Python (for AI/ML prototyping)
- Cloud Platforms (AWS basics)
- Version Control (Git, GitHub)

💼 Projects

- Developed robust APIs for multiple companies, enabling secure and scalable communication between systems.
- Built microservices for business logic automation, improving operational efficiency.
- Integrated AI-based recommendation engine into an e-commerce system.
- Created a custom chatbot using RAG to fetch intelligent answers from internal documents.

🎯 Passion

I am passionate about **learning new technologies** and staying updated with the latest in the AI/ML space. I enjoy exploring how software can be used to solve real-world problems creatively and efficiently.

🎨 Hobbies

- Watching movies (especially thrillers and sci-fi)
- Playing and following cricket
- Exploring new tech tools and gadgets

🍲 Favorite Food

- Biryani – especially spicy chicken dum biryani 🍗🔥

🌱 Personal Motto

"Keep learning. Keep building."

I believe growth comes from staying curious, solving problems hands-on, and never settling with "just okay." Whether it's mastering a new framework or understanding how transformers work under the hood — I'm always up for the challenge!
